January 27, 2026

Dear Community Partners,

On behalf of the Metropolitan School District of Washington Township, I am pleased to express our support for the Crooked Creek Cultural Campus project. This forward-thinking, community-centered initiative strengthens neighborhoods, supports families, and expands learning and creative opportunities for residents of all ages.

The Cultural Campus responds to a clear community need for shared spaces that foster learning, creativity, collaboration, and connection. By emphasizing transferable skills, critical thinking, and artistic expression, the project will serve as a meaningful hub for students, families, and the broader community.

We are particularly encouraged by the project's collaborative approach, which complements and partners with existing schools, arts organizations, libraries, parks, and community groups rather than duplicating services. This alignment positions the Cultural Campus as a true cultural focal point for the Crooked Creek community and a valuable resource for the city.

MSD of Washington Township is proud to support initiatives that preserve green space, promote lifelong learning, and enhance quality of life. We commend the vision and collaboration behind this project and look forward to its lasting positive impact for generations to come.

Sincerely,

Dr. Sean G. Taylor, Ed.D.
Superintendent
